Do you want to reach out to transport and the logistics industry?

Transportnytt, 68 years in the business!

Transportnytt is an independent magazine and web site, aiming mainly to provide relevant information for owners of transported goods and buyers of transport. Reports in the areas of logistics, materials handling, and freight using any mode of transport.

Covers the entire logistics chain including warehousing, weighing, labelling, packaging, manual and automatic handling. Focusing on the fast emerging area of e-commerce logistics. We publish thorough and well-informed tests on forklift trucks and goods vehicles.

We closely follows developments in IT, for example auto-id, TA systems, WMS and VMI. Is a driving force in the current debate on logistics, infrastructure, and public issues.

A partner for several important trade fairs, conferences and all the organisations in the area of logistics. And will continue during 2026 to cover the intense investment in new Swedish logistics facilities.

The magazine Transportnytt will cover the leading logistics property players, pointing out the hot regions for logistics, and provides an overview of where expansion is taking place.
